

## Crvenkapica broji i uspoređuje AAK alat

### Potrebni materijali:

- figurice likova,
- komunikacijska ploča s brojevima i količinama,
- kartice s brojevima,
- kartice za usporedbu veličina,
- AAK uređaji ili aplikacije.

**Ključne kompetencije:** matematika

### OPĆI CILJEVI

Ovaj alat koristi priču o Crvenkapici za razvoj ranih predmatematičkih vještina – brojanja, uspoređivanja količina i veličina – kroz simboličku igru i AAK podršku. Djeca uče kroz praktično rukovanje predmetima, čime se apstraktni pojmovi poput “više”, “manje” i brojevi čine pristupačnijima. Alat također potiče verbalnu i neverbalnu komunikaciju, izražavanje zaključaka te socijalnu interakciju.

### KAKO KORISTITI OVAJ ALAT

Komunikacijska ploča i kartice koriste se u aktivnostima u kojima djeca broje, uspoređuju i grupiraju predmete iz priče. Djeca odgovaraju na pitanja poput: “Koliko kolačića ima Crvenkapica?” koristeći kartice s brojevima i simbole. U igri

**Plural  
Words**

“*Tko ima više?*” koriste simbole kako bi izrazili količinu i uspoređivali ih s drugima. Aktivnosti su osmišljene tako da potiču komentiranje, donošenje izbora i dijalog s drugima – odraslima i vršnjacima.

## KAKO KREIRATI

Komunikacijske ploče i kartice mogu se izraditi ručno (crtanjem, ispisivanjem) ili digitalno pomoću aplikacija kao što su **Boardmaker**, **LessonPix**, **Cboard**, **Pictoselector** ili drugih besplatnih alata za izradu AAK materijala. Potrebni simboli uključuju: brojeve, matematičke pojmove (više, manje, jednako), izraze veličine (veliko/malo), kao i likove i predmete iz bajke.
